

Where we were

- Prior to October 2025 the town was using well 10b to supplement the demand of the system.
- During times when tanks were low 10b would be activated to meet demand but also replenish the tanks.
- Once the tanks got to safe levels for fire Protection well 10 would be deactivated causing the tanks to drop.

Well 10B Activation

- The Town pursued an emergency interconnection with the Town of Middleborough to limit the usage of well 10B, as it has historically done in the past.
- Well 10B is untreated for iron and manganese, as well as PFAS. Town consideration with the emergency interconnection was to limit the usage of 10B, and allow for work that will allow for 10A & 10B to be put online after being treated.

Where we are

- The Town established an interconnection with the Town of Middleborough to limit the usage of 10B.
- The Town is operating under an emergency declaration from MassDEP while we have this emergency interconnection.
- The Town is not allowing any new tie-ins for *non-approved projects* during this period. Anything further is a Council decision.
- The Town utilized this period January-current to:
 - Redevelop Well 3 – increase the capacity of the well
 - Redevelop Well 6 – increase the capacity of the well
 - Perform routine maintenance on Well #5 and Well #8
 - Evaluate & determine the best path forward for bringing Wells 10A & 10B online
- Moving forward with Plymouth Street well treatment construction.
- Submitted a grant request that is under review by the EPA via MassDEP to mitigate \$2M of expenses related to Plymouth street well treatment.
- The Town is conducting flushing to remove the sediment within the mains.

Where we are going

- The Town will construct treatment vessels that will allow Wells 10A & 10B to be utilized – thereby increasing water capacity.
- The Town will continue to advocate for additional financial resources at the federal and state levels to mitigate costs and continue infrastructure improvements.
- The Town will explore additional future water supply for the future. (Council decision)
