

The Town of Bridgewater is currently seeking available private and public properties within the Town for the construction of one or more new Fire Stations/Facilities. The Town may decide that two properties in combination are better suited to the Town's needs than one, and reserves the right to select more than one property. This search is being conducted now in preparation for a full presentation of a comprehensive Fire Station solution to the Town Council and Town Manager in the fall of 2021 or earlier. Any property owner who may have an interest in presenting his or her property for this use is compelled to respond to this "Request for Proposal."

Please see related documents for more details about this RFP.
