

Winter Street Improvement Project 2026

The work consists of removing and abandoning deteriorated corrugated metal pipe (CMP) drainage infrastructure. The installation of a new roadway drainage system consisting of reinforced concrete pipe (RCP), precast drainage manholes, precast catch basins, headwalls, precast drywells, and appurtenances within a major Town roadway.

Existing catch basins will also be removed and disposed of, and drain manholes will be left in place. This project also includes full-depth roadway reconstruction and realignment of Winter Street, as shown on the plans; water service relocations at interferences with the new drain line system; restoration of driveway aprons; tree removal; and lawn restoration in the vicinity of the roadway, along with drainage improvements. Bids shall be on a lump sum basis as indicated in the Bid Form.
