

THE TOWN OF BRIDGEWATER'S COMMUNITY CHOICE POWER SUPPLY PROGRAM

Already Enrolled with National Grid GreenUp or a Third-Party Supplier?

If a consumer doesn't receive a notification letter (for automatic enrollment), it's because their account wasn't eligible at the time of mailing (e.g. enrolled with National Grid GreenUp or a third-party supplier) and they will not be AUTOMATICALLY enrolled in the Town's Program. However, everyone in Town is eligible to join the Program. They should instead receive an informational postcard and may opt-in at any time. The only caveat is some (not all) suppliers have a termination fee for leaving their contract early. It is recommended that anyone with a third-party supplier call that supplier to confirm there isn't an exit fee before they join the Town's Program. The Town wouldn't want someone to join the aggregation and then find out they were hit with a substantial termination fee.

To join Bridgewater's Program, you can do one of two things:

1. Visit colonialpowergroup.com/bridgewater and click the OPT-IN button, then fill out and submit the Opt-In Form.
2. Call Dynegy at (866) 220-5696 and ask to join the Town of Bridgewater's Program.

For both of the above options, you should have your National Grid bill handy in order to provide some required information. Enrollments can only be processed on meter reads so it may take one or two billing cycles before taking effect.

What are the Town's product offerings?

Standard Product: Meets MA renewable energy requirements. This product is being offered at \$0.14123 per kWh for 35 months (December 2025 to November 2028).

Optional Green Product: 100% renewable, provides 37% National Wind Renewable Energy Certificates (RECs) above the state's then-current minimum requirement for renewables [63% in 2025]. This product is being offered at \$0.14223 per kWh for 35 months (December 2025 to November 2028).

Optional Green 10 Product: Provides 10% MA Class I RECs above the state's then-current requirement for these renewables [27% in 2025; 30% in 2026; 33% in 2027; 36% in 2028]. This product is being offered at \$0.14504 per kWh for 35 months (December 2025 to November 2028).

Basic Service rates change twice a year or more, depending on rate class. As a result, the aggregation rate may not always be lower than the Basic Service rate. The goal of the aggregation is to deliver savings over the life of the Program against National Grid Basic Service. However, future savings cannot be guaranteed.
