EXECUTIVE SUMMARY

PRIME Engineering, Inc. (PRIME) was contracted by the Town of Bridgewater to conduct a Phase I Environmental Site Assessment (Phase I ESA) of a major portion of 600 Pleasant Street with Parcel ID (60-10)-Lot A as well as four (4) additional parcels including (60-8, 60-18, 73-22, and 73-108) in Bridgewater, MA 02324 (Conservation Restriction Area). In conducting this assessment, PRIME followed standards set forth in American Society for Testing and Materials (ASTM) Policy E1527-21. This assessment has revealed the following findings:

- The proposed Conservation Restriction Area comprised of five (5) parcels of land totaling approximately 71.79 acres. The five (5) parcels include Lot A of 600 Pleasant Street with is a major portion of (Parcel ID 60-10) and four (4) parcels including (60-8, 60-18, 73-22, and 73-108) in Bridgewater, MA. Lot B of Parcel 60-10 includes 3.12 acres excluded from the Conservation Restriction Area and is improved with a store, Cow Barn building, and storage trailer.
- The Conservation Restriction Area is located in an area of Bridgewater used for mixed commercial and residential use.
- Historic aerial maps show a majority of the Conservation Restriction Area occupied as farmland circa 1941.
- Based on the current and past usage of the property as farmland and growing of crops, pesticides use was/is conducted. Mr. David Hanson provided a Pesticide Certificate License issued by the Commonwealth of Massachusetts-Department of Agricultural Resources. A copy of the license is included in Appendix D.
- No visual evidence of existing underground storage tanks (USTs) (i.e. fill or vents lines) were observed at the Conservation Restriction Area. According to the site owner, no USTs currently exist on any of the properties included within the Conservation Restriction Area.
- During the Site walk, PRIME observed three (3) aboveground storage tanks located near the barn building on Lot B which is **not** part of the Conservation Restriction Area. These three (3) tanks provide diesel storage for the farm equipment.
- During the Site walk, PRIME observed a pump house and storage shed located on the pond on Parcel 60-10. The pump house contained a diesel pump used to pump water for irrigation and the shed contained a 275-gallon diesel storage tank with concrete containment. The tank and shed were both in good condition with no visible signs of leakage.
- Two (2) storage trailers were observed in a cleared area along the western property line

- of Parcel 60-10. According to David Hanson, the trailers contain old milk processing equipment and storage of fertilizer.
- No evidence of releases of oil and/or hazardous material (i.e. odors, stressed vegetation, or stained soil) were observed during PRIME's site inspection of the Conservation Restriction Area. The following materials storage and housekeeping practices are noted:
 - Trailer containing small petroleum containers and various pesticides is located south of the Cow Barn on Lot B which is <u>not</u> included in the Conservation Restriction Area.

Conservation Restriction Area - Records Review/Release History

 An EDR environmental data base report was obtained and reviewed. The local, state, and federal environmental database records indicate the Conservation Restriction Area is not a FINDS Site. The Conservation Restriction Area was not listed on any other listing within the EDR Report.

Lead Paint, Asbestos and Microbial Matter

- General visual assessment within areas of the building that were readily accessible during the site walk did not identify any apparent suspect friable asbestos containing materials (ACMs).
- The Conservation Restriction Area does not contain a residential, child care or school building. Observations for suspect lead-based paint were not undertaken.
- General visual assessment during the site walk did not identify any apparent water intrusion and/or visual microbial matter growth.

Migration of Vapors

 The Scope of Work did not include a complete Vapor Encroachment Screening in accordance with ASTM Standard E2600. To comply with the prospective lender recommended format for environmental due diligence Phase I ESAs, comments are included herein regarding the potential for vapor migration.

The Conservation Restriction Area is not listed on any ASTM-specified state or federal regulatory databases. Several State Hazardous Waste Site (SHWS) Facilities were located within ½ mile of the Conservation Restriction Area; however, upon further evaluation of the MassDEP registered release sites, they were determined not to be concerns to this investigation.

PRIME performed a Phase I Environmental Site Assessment of a major portion of 600 Pleasant Street with Parcel ID (60-10)-Lot A as well as four (4) additional parcels including (60-8, 60-18, 73-22, and 73-108) in Bridgewater, MA 02324 (Conservation Restriction Area). In conducting this assessment, PRIME followed standards set forth in American Society for Testing and Materials (ASTM) Policy E1527-21.

The goal of E1527 is to identify "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property". E1527 labels the presence or likely presence of a hazardous substance (or petroleum products) as a "Recognized Environmental Condition ("REC").

The purpose of this Phase I ESA was to identify *RECs* within the Conservation Restriction Area. Pesticides were/are utilized for the various crops at the farm, however according to the Hanson Family, the pesticides are applied in a manner consistent with their labeling. This assessment has revealed no evidence of recognized environmental conditions in connection with the Conservation Restriction Area. Therefore, PRIME recommends no further investigation at this time.

1.0 INTRODUCTION

PRIME Engineering, Inc. (PRIME) was contracted by the Town of Bridgewater to conduct a Phase I Environmental Site Assessment (Phase I ESA) of 600 Pleasant Street with Parcel ID (60-10) as well as four (4) additional parcels including (60-8, 60-18, 73-22, and 73-108) in Bridgewater, MA 02324 (Conservation Restriction Area).

1.1 Purpose

The purpose of the Phase I ESA is to evaluate the environmental condition of the Conservation Restriction Area and assess the potential for any contamination through the identification of conditions indicative of a release or threatened release of hazardous substances at or to the Conservation Restriction Area. The Phase I ESA is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability that is the practice that constitutes all appropriate inquires into the previous ownership and uses of the property consistent with good commercial and customary practice.

The Phase I ESA was conducted in general accordance with the American Society of Testing and Materials (ASTM) Standard Practice (practice) for Environmental Site Assessments: Phase I ESA Process (ASTM Designation: E 1527-13). The processes established by the Phase I ESA practice is to identify *recognized environmental conditions* (RECs) in connection with the Conservation Restriction Area. ASTM defines RECs as the presence or likely presence of any hazardous substances or petroleum products in, on, or at the Conservation Restriction Area: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. RECs may include a *controlled REC* (CREC) or a historic REC (HREC). Where appropriate, de minimis conditions are noted. Appendix A, Definitions and Clarifications, provides additional discussion of the REC categories and other clarifications.

1.2 Scope of Services

The scope of work for this assessment was in general accordance with the American Society of Testing and Materials (ASTM) Standard Practice (practice) for Environmental Site Assessments: Phase I ESA Process (ASTM Designation: E 1527-21).

In accordance with the above-referenced agreement, PRIME performed a visual reconnaissance of the Conservation Restriction Area, noted use of adjacent properties, and conducted historical and regulatory records research. The following provides a more detailed description of the scope of services:

 Visual inspection of the Conservation Restriction Area grounds to identify the potential for oil and/or hazardous material (OHM) release(s):

- Visual inspection of the Conservation Restriction Area for indications of the presence or absence of polychlorinated biphenyls (PCBs) (e.g. transformers);
- Visual inspection and categorization of the use of properties which abut the Conservation Restriction Area for potential off-site sources of OHM contamination;
- Review of local records related to historical ownership, usage and Site development. This
 also included interviewing local environmental authorities to identify complaints,
 violations, citations, or inspections related to the Conservation Restriction Area;
- Interview with a representative of the present owner of Conservation Restriction Area Properties;
- Review of published federal regulatory records related to activities at the Conservation Restriction Area,
- and to potential off-site sources of OHM contamination. Federal records reviewed included the following:
 - National Priorities List (NPL);
 - Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS);
 - Resource Conservation and Recovery Act (RCRA); and
 - Emergency Response Notification System (ERNS).
- Review of readily available Massachusetts Department of Environmental Protection (MassDEP) records and publications for environmental activities at the Conservation Restriction Area and potential off-site sources of OHM contamination. State records reviewed included the following:
 - MassDEP Reportable Release Lookup Database;
 - MassDEP Registered Underground Storage Tanks (USTs) Database; and
 - MassDEP Registered State Solid Waste Facilities.
- Review of readily available historic documents related to the Conservation Restriction Area to assess for potential sources of OHM contamination;
- Review of readily available historic references such as aerial photographs, Sanborn Fire Insurance Maps, previous environmental studies, and/or ownership records associated with the Subject Properties and adjoining properties to evaluate present and historical development/facilities;
- Review of readily available plans and documents relative to construction materials utilized at the Conservation Restriction Area and any historical renovation activities;

- Review of an Environmental Radius Report;
- Review of historic Environmental Reports; and
- Preparation of this report.

1.3 Significant Assumptions

While this report provides an overview of RECs, the environmental assessment is limited by the availability of information and the limitations of visual inspection at the time of the assessment. It is possible that unreported waste disposal or other activities that had the potential to impair the environmental condition of the property may have occurred, and could not be identified. The conclusions and opinions regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

1.4 Limitations and Exceptions

The report has been prepared in accordance with generally accepted environmental methodologies referred to in ASTM 1527-21, and contains all of the limitations inherent in these methodologies as well as the specific limitations discussed in Appendix A - Definitions and Clarifications and Appendix B - Limitations of this Report.

PRIME can make no representation as to the accuracy of completeness of the information contained within any historic reports by others, or the current soil or groundwater conditions at the Conservation Restriction Area considering the scope of this project did not include subsurface investigation or laboratory analysis of any type of media samples.

No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report.

1.5 User Reliance

This report may be distributed and relied upon by Client, its successors and assigns. Reliance on the information and conclusions in this report by any other person or entity is not authorized without the written consent of PRIME.

1.6 Data Gaps

This Section provide deletions and data gaps, if any, from the ASTM Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process (E 1527-21). Data gaps are defined as lack of or inability to obtain information required by the ASTM E 1527-21 practice despite *good faith* efforts by the *environmental professional* to gather such information. *Data gaps* may result from incompleteness in any of the activities required by this practice, including, but not limited to *site reconnaissance* (for example, an inability to conduct the *site visit*),

and *interviews* (for example, an inability to interview the key site manager, or regulatory officials, etc. No data gaps were identified.

2.0 SITE DESCRIPTION

The following subsections provide information regarding the location, setting, history, and environmental condition of the Conservation Restriction Area. The location and pertinent details associated with the Conservation Restriction Area are graphically depicted in Figures 1 through 3. Photographs of the Conservation Restriction Area and pertinent characteristics are included in Appendix C.

2.1 Site Location and Description

Address: Major Portion of 600 Pleasant Street

Bridgewater, MA 02324

Assessor's Info: Parcel ID 60-10-Lot A

53.5 Acres

Additional Parcels Parcel ID 60-8

2.04 Acres

Parcel ID 60-18 0.148 Acres

Parcel ID 73-22 14.0 Acres

Parcel ID 73-108

1.93 Acres

Latitude/Longitude: 41°58'32.29"N, 70°59'42.15"W

Current Owner: Carol Chaffee & David E Hanson

Trustees Hanson Family Realty

600 Pleasant Street Bridgewater, MA 02324

Sanitary Waste: The parcels included in this Conservation Restriction Area are

undeveloped.

USTs/ASTs: No evidence of existing underground storage tanks (USTs) (i.e. fill or

vents lines) were observed during the site walk within the parcels included in the Conservation Restriction Area. PRIME observed one (1) 275-gallon diesel aboveground storage tank (AST) within a shed with a concrete containment adjacent to the pump house on the pond in the central portion of Parcel 60-10. The tank was in good condition and no evidence of spillage was observed. Additionally, PRIME observed three (3) 500 gallon diesel ASTs that store diesel fuel for farm equipment. The three (3) ASTs are located on Lot B which is excluded from the Conservation Restriction Area.

Transformers: None observed

Floor Drains: None observed.

Additional OHM: A storage trailer located on Lot B stores small containers of

petroleum products as well as pesticides. All containers appeared to be in good condition. A hand written list of pesticides was

provided by David Hanson and is included in Appendix K.

2.2 Description and Current Use of Conservation Restriction Area

The Conservation Restriction Area is a proposed Conservation Restriction (CR) Area comprised of five (5) parcels of land totaling approximately 71.79 acres. The five (5) parcels include Lot A of 600 Pleasant Street with is a large portion of (Parcel ID 60-10) and four (4) parcels including (60-8, 60-18, 73-22, and 73-108) in Bridgewater, MA. The Conservation Restriction Land includes farmland, wetlands, ponds, woodlands. Lot B of Parcel 60-10 includes 3.12 acres excluded from the Conservation Restriction Area and is improved with a store, Cow Barn building, and storage trailer.

2.3 Historic Use of The Conservation Restriction Area

Past uses of the Conservation Restriction Area were investigated to identify historical practices and/or conditions which may have impacted soil and/or groundwater at the Conservation Restriction Area. Based on an interview with current property owner, and review of historic aerial photographs, topographical maps, fire insurance atlas maps (Sanborn Maps), EDR City Directories, local records, and/or MassDEP Site File records, the following is a description of the known historic use of the Conservation Restriction Area:

• The majority of the Conservation Restriction Area is/was farmland while additional portions include woodlands and wetlands.

2.4 Current Use of Abutting Properties

The Conservation Restriction Area is located in an area of Bridgewater used for mixed commercial and residential purposes. The following is a brief description of the current uses of abutting properties:

North: Pleasant Street and further north residential properties

East: Woodlands and further east residential properties

South: Woodlands

West: Pleasant Street and further north residential properties

2.5 Historic Use of Abutting Properties

The following is a summary of the historic uses of abutting properties, based on a review of historic aerial photographs, historic topographic maps, fire insurance atlas maps, and records maintained by the MassDEP:

• Historic use of abutting properties included woodlands, residential, and commercial use.

3.0 CURRENT USER PROVIDED INFORMATION

The ASTM Standard for a Phase I ESA requires an assessment of the information and knowledge that the current owner possesses relative to the Conservation Restriction Area. Information in the following subsections was obtained from an interview questionnaire by Mr. David Hanson, one of the owners of the Conservation Restriction Area, completed on May 14, 2025. The completed questionnaire form is included in Appendix D.

3.1 Title Records

PRIME was not provided with title records for the Conservation Restriction Area.

3.2 Environmental Liens of Activity and Use Limitations

According to Mr. Hanson, no administrative controls (Environmental Liens or Activity and Use Limitations) have been placed on the Conservation Restriction Area.

3.3 Environmental Impairment and/or Releases of OHM

Mr. Hanson knows of the former historical usage of the property and is not aware of any former releases of OHM at the Conservation Restriction Area.

3.4 Specialized Knowledge

Mr. Hanson provided PRIME with the following knowledge of the past usage and development of the Conservation Restriction Area:

• Portions of the 600 Pleasant Street property and the other parcels included in the Conservation Restriction Area were utilized for farmland for numerous decades.

3.5 Commonly Known or Reasonably Ascertainable Knowledge

Mr. Hanson did not know of any commonly known or reasonably ascertainable knowledge that would assist PRIME in the identification of potential RECs.

3.6 Valuation Reduction for Environmental Issues

According to Mr. Hanson there has been no reduction in the value of the Conservation Restriction Area due to the knowledge of any environmental conditions.

3.7 Interview With the Current Owner

Mr. David Hanson, the owner of the Conservation Restriction Area, completed an Environmental Review Questionnaire Form on May 14, 2025. A copy of the questionnaire form is included in Appendix D.

3.8 Reason for Performing the Phase I Assessment

PRIME was contracted by the Town of Bridgewater, prospective purchaser to conduct a due diligence Phase I ESA at the Conservation Restriction Area.

4.0 Historical Use Information

Past land uses were reviewed to identify historical practices or conditions at or in the vicinity of the Conservation Restriction Area which may have impacted the environmental quality of the Conservation Restriction Area. This was accomplished via an interview with the current owner of the Conservation Restriction Area; review of historic aerial photographs (Appendix F); review of Sanborn Fire Insurance Atlases (Appendix G), review of historic USGS topographic maps (Appendix H); review of City Directories (Appendix I); and review of environmental records maintained by the federal, state, and local agencies (Appendix J and K).

4.1 Previous Environmental Reports

No previous environmental reports regarding environmental conditions for the Conservation Restriction Area were provided.

4.2 Past Usages of The Conservation Restriction Area

A review of historic aerial photographs, USGS topographic maps, Sanborn Fire Insurance Atlases, and local records for the Conservation Restriction Area and nearby properties was conducted to assess historical activities or owners which may have impacted the Conservation Restriction Area. The following sections discuss the findings.

4.2.1 Aerial Photographs

As part of this assessment, PRIME reviewed aerial photographs from 1941, 1952, 1960, 1970, 1974, 1980, 1985, 1995, 2006, 2010, 2014, and 2018. Review of aerial photographs revealed farmland and woodlands at the Conservation Restriction Area in approximately 1941. Aerial photographs are included in Appendix F.

4.2.2 Sanborn Fire Insurance Atlases

The Sanborn report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found. Sanborn Map information is included in Appendix G.

4.2.3 Historical USGS Topographical Maps

PRIME reviewed USGS Topographic Maps from 1888, 1893, 1915, 1916, 1918, 1937, 1940, 1943, 1944, 1947, 1949, 1962, 1977, 1978, 1979, 1985, 1987, 2012, 2015, 2018, and 2021. Copies of USGS Topographic Maps are included in Appendix H. An evaluation of Historic USGS Topographic Maps did not reveal any RECs in connection with the historic use of the Conservation Restriction

Area.

4.2.4 City Directories

As part of this assessment, PRIME reviewed City Directories from 1988, 1992, 1995, 2000, 2005, 2010, 2014, 2017, and 2020. The review indicated the following historic property occupants/listings at 906 North Bedford Street:

1988: No Listing 1992: No Listing 1995: No Listing 2000: No Listing

2005: Hanson Farm Inc

2010: Hanson Farm Inc and David Hanson

2014: Hanson Farm Inc 2020: Hanson Farm Inc

Copies of the City Directories are included in Appendix I.

4.2.5 Registry of Deeds Information

Records at the Plymouth County Registry of Deeds were not reviewed during this assessment.

4.2.6 Environmental Liens and Activity and Use Limitations

In accordance with the requirements of 310 CMR 40.0000, records associated with Activity and Use Limitations (AULs) in Massachusetts must be filed with the MassDEP. Based on a review of the MassDEP Release Site Lookup Database, the Conservation Restriction Area is not a registered release site, and future uses of the Conservation Restriction Area have not been limited via implementation of an AUL.

5.0 PHYSICAL SETTING

Topography: The Conservation Restriction Area is located at approximately 86-102 feet

above mean sea level. Surface topography at the Conservation Restriction

Area generally slopes down to the south and west.

Local Geology: According to the US Department of Agriculture Soil Map of Plymouth

County (Appendix E), there are numerous soil classifications for the Conservation Restriction Area ranging from Merrimac fine sandy loam to Sudbury fine sandy loam to Scarboro muck, coastal lowland as well as others. Please refer to Appendix E for a copy of the US Department of

Agriculture Soil Map.

Groundwater

Characteristics: Based on local topographical trends, groundwater flow direction is likely to

be to the east southeast.

Water Supply &

Groundwater Use: A portion of the Conservation Restriction Area is located within a current

MassDEP approved drinking water resource area including a Zone II Wellhead Protection Area and partially in a "Medium Yield Aquifer Area".

Wetlands &

Surface Water: Freshwater wetlands are located on the eastern and southern portion of

the Conservation Restriction Area.

Environmental

Receptors: The Conservation Restriction Area is not located within NHESP mapped

Estimated Habitat of Rare Wildlife or Rare Species or an Area of Critical Environmental Concern (ACEC). A portion of the Conservation Restriction Area is located within a Zone II Wellhead Protection Area and Medium Yield

Aquifer Area.

6.0 Conservation Restriction Area RECONNAISSANCE

Eric Sullivan of PRIME, conducted reconnaissance of the Conservation Restriction Area (site visit) on May 14, 2025. The site visit consisted of an inspection of the Conservation Restriction Area grounds and visual reconnaissance of neighboring properties from curbside. Prior to the site visit, readily available resources such as geologic maps, soil reports, wetland maps, site plans, historic aerial photographs, USGS topographic maps, flood insurance rate maps, and regulatory records were reviewed.

6.1 Site Operations

A description of the Conservation Restriction Area is included in Section 2.2. The Conservation Restriction Land includes farmland, wetlands, ponds, woodlands.

6.2 Storage Tanks and Drums

Current USTs/ASTs: No evidence of existing underground storage tanks (USTs) (i.e. fill or vents lines) were observed during the site walk within the parcels included in the Conservation Restriction Area. PRIME observed one (1) 275-gallon diesel aboveground storage tank (AST) within a shed with a concrete containment adjacent to the pump house on the pond in the central portion of Parcel 60-10. The tank was in good condition and no evidence of spillage was observed. Additionally, PRIME observed three (3) 500 gallon diesel ASTs that store diesel fuel for farm equipment. The three (3) ASTs are located on Lot B which is excluded from the Conservation Restriction Area.

6.3 Hazardous Substances and Petroleum Products

A storage trailer containing small petroleum containers and pesticides is located south of the Cow Barn on Lot B, however Lot B is **not** included in the Conservation Restriction Area.

6.4 Unidentified Substance Containers

During the site walk, PRIME did not observe any unidentified substance containers.

6.5 Polychlorinated Biphenyls

No transformers were observed within the Conservation Restriction Area.

6.6 Stained Surfaces, Stressed Vegetation, and/or Odors

During the site visit, PRIME did not observe any stained surfaces, stressed vegetation and/or detect any odors at the Conservation Restriction Area.

6.7 Pits, Ponds, or Lagoons

PRIME personnel did not observe pits or lagoons within the Conservation Restriction Area. PRIME observed freshwater ponds within the Conservation Restriction Area.

6.8 Waste Water or Storm water Discharge/Disposal

No waste water or storm water discharge was observed within the Conservation Restriction Area.

6.9 Monitoring Wells

No onsite monitoring well were observed during the site walk.

6.10 Septic Systems, Drywells, or Cesspools

The Conservation Restriction Area is undeveloped with no buildings present therefore no septic system are present.

6.11 Floor Drains and Sumps

The Conservation Restriction Area is undeveloped with no building present therefore PRIME did not observe any floor drains.

6.12 Oil Water Separators

PRIME did not observe oil water separator during the site walk within the Conservation Restriction Area.

6.13 Hydraulic Lifts

The Conservation Restriction Area is undeveloped with no building present therefore PRIME did not observe any hydraulic lifts.

6.14 Neighboring Properties

Curbside reconnaissance did not reveal any conditions of concern (i.e. waste storage, dumping or overt sources of subsurface impacts) on adjacent properties.

7.0 RECORDS REVIEW

7.1 Federal and State Record Review

PRIME procured and reviewed an environmental radius report (ERR) from Environmental Data Resources, Inc. (EDR) (Environmental Database Report) on May 12, 2025. A copy of the ERR is included in Appendix J. A review of databases and files from federal, state, and local environmental regulatory agencies was conducted to identify use, generation, storage, treatment or disposal of hazardous materials and chemicals, or release incidents of such materials which may impact the Conservation Restriction Area, relative to ASTM-specified search radii.

In addition, PRIME conducted a review of records at various local agencies. Interviews were conducted with officials from these agencies to obtain specific information about areas located on or near the Conservation Restriction Area with reported problems. Results of the records review are presented in the following subsections.

7.1.1 Federal Regulatory Records

A complete listing of the federal regulatory sources reviewed is provided in the ERR. Federal records reviewed include: National Priority List sites (NPL), Comprehensive Environmental Response, Compensation, and Liability Information System facilities (CERCLIS), and Resource Conservation Recovery Act Hazardous Waste Generators (RCRA Generators) within ASTM-specified search radii. A review of the referenced federal records indicate that the Conservation Restriction Area is not listed on any of the above-referenced federal databases. The following subsections provide additional information regarding nearby facilities.

7.1.1.1 Federal NPL List

The NPL database, also known as the Superfund List, is a subset of CERCLIS and identifies sites that are ranked as high priority for remedial action under the Federal Superfund Act.

• Neither the Conservation Restriction Area, nor any sites located within one-mile of the Conservation Restriction Area, were identified on the NPL database.

7.1.1.2 Federal CERCLIS List

CERCLIS contains data regarding potentially hazardous waste sites that have been reported to the US EPA by states, municipalities, private companies, and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act. CERCLIS contains sites that are included in the NPL database, as well as sites which are in the screening and assessment phase for possible inclusion on the NPL.

• Neither the Conservation Restriction Area, nor any sites located within ½ mile of the Conservation Restriction Area, were identified on the Federal CERCLIS List.

7.1.1.3 Federal RCRA Generators

Hazardous waste generators tracked under the Resource Conservation and Recovery Act (RCRA) are classified as either Large Quantity Generators (LQGs), Small Quantity Generators (SQGs), or Very Small Quantity Generators (VSQGs).

Zero RCRA Generators are listed within ½ a mile of the Conservation Restriction Area.

7.1.1.4 Federal Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. The Assessment, Cleanup, and Redevelopment Exchange System (ACRES) is an online database for Brownfields Grantees to electronically submit data directly to the USEPA.

7.1.1.5 Federal Emergency Response Notification System (ERNS)

ERNS is a national database used to collect information regarding reported releases of petroleum products and/or hazardous substances. The database contains information from spill reports submitted to Federal agencies, including the US EPA, the US Coast Guard, the National Response Center, and the US DOT. A review of this database was conducted in order to determine whether any spills or incidents involving releases of OHM have occurred at the Conservation Restriction Area.

• The Conservation Restriction Area was not identified on the ERNS database.

7.1.1.6 Federal Facility Index System (FINDS)

FINDS is a database managed by the US EPA, which identifies facilities, sites, or places subject to environmental regulations or of environmental interest. The database provides information regarding environmental activities that may impact air, water, and land in the United States. It is usually a cross-reference to other sources/database that contain more detail.

The Conservation Restriction Area is **not** listed as a FINDS Site.

7.2 State Regulatory Records

A complete listing of the state regulatory sources reviewed is provided in the Environmental Database Report. State records reviewed include: state-registered underground storage tanks

(UST), state-listed leaking underground storage tanks (LUST), state-listed leaking above ground storage tanks (LAST), state-permitted solid waste facilities/landfill sites (SWF/LS), and state-listed hazardous waste sites (SHWS) within the ASTM-specified search radii. A review of state records indicates that the Conservation Restriction Area is a state-listed hazardous waste sites (SHWS). Several properties in the vicinity of the Conservation Restriction Area are also identified on one or more of the regulatory sources reviewed. The following subsections discuss the state regulatory records review findings.

7.2.1 State Hazardous Waste Sites

Eleven (11) listed MassDEP Release Site locations are located within 1 mile of the Conservation Restriction Area. Numerous off-site releases are not considered to be a concern to this investigation for one of the following reasons:

- Response Action Outcomes (RAOs)/Permanent Solution Statements (PSS), or Adequately Regulated by MassDEP have been submitted to the Massachusetts Department of Environmental Protection (MassDEP) for all of the MassDEP release sites within 1-mile. Submission of Solution Statements to the MassDEP indicates that the release is considered to be fully delineated and adequately assessed and it has been demonstrated that the release poses No Significant Risk to human health or the environment
- Several of the MassDEP sites within ½-1 mile are located either hydraulically crossgradient
 or downgradient of the Conservation Restriction Area. Therefore, migration from these
 off-site releases towards the Conservation Restriction Area is not considered to be likely.

7.2.2 State Registered UST Facilities

The Conservation Restriction Area is not listed on the MassDEP's UST System facility database.

7.2.3 State Landfills

Based on a review of the Environmental Database Report, no records of State Landfills are within the specified ASTM-specified search radii of the Conservation Restriction Area.

7.2.4 Institutional Controls

According to the MassDEP Release Site Lookup, the Conservation Restriction Area does not have a recorded Activity and Use Limitation.

7.2.5 Tribal Records

Based on a review of the Environmental Database Report, no records of tribal facilities that were

hazardous waste sites, landfills, LUST, LAST, registered storage tank sites, institutional control sites, voluntary cleanup sites, or Brownfield sites are located within the specified ASTM-specified search radii of the Conservation Restriction Area.

7.3 Local Records

PRIME inquired with the Bridgewater Assessor's Department, Board of Health, Clerk's Office, Fire Department, and Building Department to find records pertaining to OHM storage, releases, and/or violations associated with the Conservation Restriction Area. The following subsections include information regarding local records review.

7.3.1 Assessor's Information

PRIME reviewed documents available through the Bridgewater Assessor's Department. According to assessor's field cards provided online by the Town of Bridgewater Assessor's Department, Carol Chaffee and David E Hanson are listed as the owners of the parcels included in the Conservation Restriction Area. Copies of the current assessor's field cards are included in Appendix K.

7.3.2 Board of Health

PRIME personnel visited the Bridgewater Board of Health on May 14, 2025. The Bridgewater Board Of Health did not provide any files regarding the Conservation Restriction Area.

7.3.3 Clerk's Office

PRIME personnel visited the Bridgewater Clerk's Office on May 14, 2025. The Bridgewater Clerk's Office did not provide any files regarding the Conservation Restriction Area.

7.3.4 Fire Department

PRIME personnel contacted the Bridgewater Fire Department's Office on May 14, 2025. On May 14, 2025, the Bridgewater Fire contacted PRIME back and requested PRIME go online to Permit Eyes and complete an application for an Environmental Report (21E). On June 6, 2025, PRIME received the file from the Bridgewater Fire Department via the online platform Permit Eyes. According to the file dated January 26, 2023, pesticides are stored at Hanson Farm within two (2) locations. During the winter, November to March, storage of pesticides is in the basement of the Farm Stand and the trailer behind the Cow Barn. During April through October, all pesticides are stored in the trailer behind the Cow Barn. Fertilizer is stored in a open shed at the back end of the Cow Barn year round. A pesticide Inventory was also included with a Date of December 19, 2022. For the file and inventory list, see the Fire Department files which are included in Appendix K.

7.3.5 Building Department

PRIME personnel conducted a file review at the Bridgewater Building Department on May 14, 2025. Files including electrical permits, building permits, inspections, etc. were provided, however these files pertain to the buildings associated with Parcel 60-10, Lot B, therefore the permits are not included in this report. The Bridgewater Building Department did not provide any files regarding the Conservation Restriction Area.

7.4 Previous Environmental Assessments

No Previous Environmental Assessments were provided for the Conservation Restriction Area.

8.0 POTENTIAL FOR VAPOR MIGRATION

The Scope of Work did not include a complete Vapor Encroachment Screening in accordance with ASTM Standard E2600. Potential on-Site and off-Site sources of vapor intrusion were not identified. PRIME assessed the potential for vapor intrusion impacts to the Site from potential on and off-Site sources of oil or hazardous material. The potential for vapor intrusion impacts included a review of current/historical on and off-Site operations and a review of environmental regulatory database records.

9.0 NON-ASTM SCOPE ITEMS

The following sections are not included in the scope of ASTM Standard E 1527-21.

9.1 Suspect Asbestos Containing Material

During the site walk, PRIME conducted a general visual asbestos assessment. Observation of conditions during the site walk did not identify any apparent suspect friable asbestos containing materials (ACMs).

Asbestos can be found in many applications, including sprayed-on or blanket-type insulation, pipe wraps, mastics, floor and ceiling tiles, wallboard, mortar, roofing materials, and a variety of other materials commonly used in construction. It is noted that if present, many of these materials may not have been observable during the site walk and the completion of an ACM survey and the collection of representative building material samples for asbestos analysis would be required to better determine the presence or absence of ACMs in the building. The completion of an ACM survey/sampling was not included in the scope of work.

9.2 Lead Based Paint

The Conservation Restriction Area does not contain a residential, child care, or school building.

10.0 FINDINGS & OPINION

PRIME Engineering, Inc. (PRIME) was contracted by the Town of Bridgewater to conduct a Phase I Environmental Site Assessment (Phase I ESA) of a portion of 600 Pleasant Street with Parcel ID (60-10)-Lot A as well as four (4) additional parcels including (60-8, 60-18, 73-22, and 73-108) in Bridgewater, MA 02324 (Conservation Restriction Area). In conducting this assessment, PRIME followed standards set forth in American Society for Testing and Materials (ASTM) Policy E1527-21. This assessment has revealed the following findings:

- The Conservation Restriction Area is a proposed Conservation Restriction (CR) Area comprised of five (5) parcels of land totaling approximately 71.79 acres. The five (5) parcels include Lot A of 600 Pleasant Street with is a large portion of (Parcel ID 60-10) and four (4) parcels including (60-8, 60-18, 73-22, and 73-108) in Bridgewater, MA. Lot B of Parcel 60-10 includes 3.12 acres excluded from the Conservation Restriction Area and is improved with a store, Cow Carn building, and storage trailer.
- The Conservation Restriction Area is located in an area of Bridgewater used for mixed commercial and residential use.
- Historic aerial maps show a majority of the Conservation Restriction Area occupied as farmland circa 1941.
- Based on the current and past usage of the property as farmland and growing of crops, pesticides use was/is conducted. Mr. David Hanson provided a Pesticide Certificate License issued by the Commonwealth of Massachusetts-Department of Agricultural Resources. A copy of the license is included in Appendix D.
- No visual evidence of existing underground storage tanks (USTs) (i.e. fill or vents lines) were
 observed at the Conservation Restriction Area. According to the site owner, no USTs
 currently exist on the property.
- During the Site walk, PRIME observed three (3) aboveground storage tanks located near
 the barn building on Lot B which is **not** part of the Conservation Restriction Area. These
 three (3) tanks provide diesel storage for the farm equipment.
- During the Site walk, PRIME observed a pump house and storage shed located on the pond on Parcel 60-10. The pump house contained a diesel pump used to pump water for irrigation and the shed contained a 275-gallon diesel storage tank with concrete containment. The tank and shed were both in good condition with no visible signs of leakage.

- June 13, 2025
- Two (2) storage trailers were observed in a cleared area along the western property line.
 According to Bob Hanson, the trailers contain old milk processing equipment and storage of fertilizer.
- No evidence of releases of oil and/or hazardous material (i.e. odors, stressed vegetation, or stained soil) were observed during PRIME's site inspection of the Conservation Restriction Area. The following materials storage and housekeeping practices are noted:
 - Storage trailer containing small petroleum containers and pesticides is located south of the Cow Barn on Lot B which is **not** included in the Conservation Restriction Area.

PRIME performed a Phase I Environmental Site Assessment of a major portion of 600 Pleasant Street with Parcel ID (60-10)-Lot A as well as four (4) additional undeveloped parcels including (60-8, 60-18, 73-22, and 73-108 in Bridgewater, MA 02324 (Conservation Restriction Area) in conformance with the scope and limitations of ASTM Practice E1527.

The goal of E1527 is to identify "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property". E1527 labels the presence or likely presence of a hazardous substance (or petroleum products) as a "Recognized Environmental Condition ("REC").

The purpose of this Phase I ESA was to identify *RECs* within the Conservation Restriction Area. Pesticides were/are utilized for the various crops at the farm, however according to the Hanson Family, the pesticides are applied in a manner consistent with their labeling. This assessment has revealed no evidence of recognized environmental conditions in connection with the Conservation Restriction Area. Therefore, PRIME recommends no further investigation at this time.

12.0 SIGNATURES/QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Conservation Restriction Area. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. The qualifications of the environmental professional(s) and personnel conducting the Site reconnaissance are included in Appendix B.

Scope of Work Definitions and Clarification

In defining a standard of good commercial and customary practice for conducting an ESA of property, the goal of the processes established by this practice is to identify RECs. The term recognized environmental condition (REC), according to ASTM E 1527-13 means "the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: 1) due to release to the environment; 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment." De minimis conditions are not RECs.

ASTM E 1527-21 defines a *controlled REC* (CREC) as "a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations [AUL(s)], institutional controls, or engineering controls). A condition considered by the EP to be a CREC shall be listed in the findings section of the Phase I ESA report, and as a REC in the conclusions and findings sections of the Phase I ESA. A condition identified as a CREC does not imply that the EP has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the required control that has been, or is intended to be, implemented."

ASTM E 1527-21 defines an historical REC (HREC) as "a past release of hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls (for example property use restrictions, AULs, institutional controls, or engineering controls). Before calling the past release a HREC, the Environmental Professional must determine whether the past release is a REC at the time of the Phase I ESA is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC. "

A *de minimis condition* is a condition that generally does not represent a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not recognized environmental conditions nor controlled recognized environmental conditions.

This assessment included a Site reconnaissance, as well as research and interviews with representatives of the public, property management, and regulatory agencies, as available. For the purposes of preparing this Phase I ESA, the terms migrate or migration refer to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface. Vapor migration in the subsurface is

described in Guide E2600; however, nothing in this practice for a Phase I ESA should be construed to require application of the Guide E2600 standard to achieve compliance with all appropriate inquiries (AAI).

• An evaluation was not conducted, pursuant to Guide E2600, as part of the scope of services unless otherwise noted herein this report.

ASTM E 1527-21 defines a *business environmental risk* as "a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice".

• The scope of this report does not include an evaluation of environmental business risk.

Pursuant to ASTM E 1527-21, it is the User's responsibility to provide information for the Site regarding Environmental Lien(s) and to conduct or provide a current title search including any AUL(s).

• The scope of services herein includes a review of all information and documentation provided by the User during the course of preparing this report, but does not include research for Environmental Liens or AULs unless otherwise noted.

LIMITATIONS

This site assessment was performed in accordance with generally accepted practices of other consultants undertaking similar studies at the same time and in the same geographical area, and the same degree of care and skill was conducted as is generally exercised by other consultants under similar circumstances and conditions. The scope of work for this project was developed to provide assurances for The Town of Bridgewater. The findings and conclusions must be considered not as scientific certainties, but rather as professional opinion concerning the significance of the limited data gathered during the course of the environmental site assessment in accordance with the specific scope of services. No other warranty, expressed or implied, is made. Specifically, PRIME Engineering, Inc. does not and cannot represent that the Site contains no hazardous material, oil or other latent condition beyond that observed during this site assessment.

This assessment and report have been prepared on behalf of and for the benefit of The Town of <u>Bridgewater</u> solely for use in an environmental assessment of the Conservation Restriction Area. If any third parties wish to rely on any of such material then such third parties must obtain the written consent of PRIME Engineering in order to do so, such consent not to be unreasonably withheld. The report and other materials resulting from PRIME Engineering, Inc.'s efforts on this project are not intended or represented to be suitable for reuse by The Town of Bridgewater beyond a period of 180 days, or on extensions or modifications of this project beyond environmental due diligence and associated follow-up.

It should be noted that all environmental assessments are inherently limited in the sense that conclusions are drawn and recommendations developed from information obtained from limited research and site evaluation. Except as specifically noted in this report, subsurface conditions were not field investigated as part of this study and may differ from the conditions implied by the surficial observations. Additionally, the passage of time may result in a change in the environmental characteristics at this Conservation Restriction Area and surrounding Property. This report does not warrant against future operations or conditions, nor does this warrant operations or conditions present of a type or at a location not investigated. This report is not a regulatory compliance audit.

It must be noted that no investigation can absolutely rule out the existence of any hazardous materials at a given site. This assessment has been based upon research of prior history and observable conditions of the Conservation Restriction Area. Existing hazardous materials and contaminants can escape detection using these methods.

QUALIFICATIONS

The environmental professionals who conducted the Phase I ESA have the necessary qualifications based on education, training, and experience to evaluate the properties' environmental conditions and assess the potential for any contamination. They have developed and performed *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312 and ASTM E1527-13.

Environmental Professional Qualifications Overview

The environmental professionals maintain current training and knowledge of environmental standards and regulations and have extensive experience conducting assessments and field investigation programs. The environmental professionals have completed a vast number of *all appropriate inquiry* environmental assessments to evaluate the presence of recognized environmental conditions on properties in accordance with current industry standards.

Richard J. Rheaume, **P.E, LSP** is a civil and environmental engineer with over 47 years of experience overseeing teams of professionals working on complex projects. As Chief Engineer and Principal in Charge, he served as the projects QA/QC Director thereby assuring that all of the work conducted meets appropriate industry standards and PRIME Engineering's rigorous requirements. Mr. Rheaume maintains overall responsibility for assessment and regulatory related decisions. Mr. Rheaume is the environmental professional responsible for the Phase Environmental Site Assessment and has signed the report.

I declare that to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in 312.10 of 40 CFR and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Conservation Restriction Area. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Eric J. Sullivan is a Senior Environmental Scientist with over 18 years of experience in environmental assessment and subsurface investigations. He is versed in the requirements of the EPA AIA and ASTM Environmental Assessment Standards. Throughout his career, Mr. Sullivan has functioned in the role of Senior Scientist and Project Manager for due diligence environmental investigations and regulated MCP site investigations and clean-ups, performing research, directing the field investigations, interpreting environmental data and preparing complex technical reports. Mr. Sullivan is also knowledgeable of many additional federal and state environmental regulations and routinely assist clients in permitting and compliance requirements.

Company Overview

PRIME Engineering is a full service consulting firm, in business for over 28 years, providing a wide range of engineering, environmental and survey services to municipal, commercial, institutional and private clients throughout the northeastern United States.

PRIME Engineering's professional staff include design and environmental engineers, geologists, environmental scientists, wetlands specialists, land surveyors, and project managers who also have expertise in providing a full scope of support services to solve the many engineering, design, permitting and compliance challenges that are being encountered by lending institutions, municipalities, industrial and commercial entities.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:12.000.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service Web Soil Survey URL:

Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Plymouth County, Massachusetts Survey Area Data: Version 17, Aug 27, 2024

Soil map units are labeled (as space allows) for map scales 1:50.000 or larger.

Date(s) aerial images were photographed: Jun 14, 2022—Jul 1, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Map Unit Legend

Map Unit Symbol	Map Unit Name	Acres in AOI	Percent of AOI
1	Water	0.7	1.5%
6A	Scarboro muck, coastal lowland, 0 to 3 percent slopes	6.1	12.9%
37A	Massasoit - Mashpee complex, 0 to 3 percent slopes	4.3	9.2%
48A	Brockton sandy loam, 0 to 3 percent slopes, extremely stony	0.0	0.0%
52A	Freetown muck, 0 to 1 percent slopes	1.0	2.1%
254B	Merrimac fine sandy loam, 3 to 8 percent slopes	15.5	32.9%
260B	Sudbury fine sandy loam, 3 to 8 percent slopes	12.0	25.4%

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Prime Engineering were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT. Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

Copyright 2025 by Environmental Data Resources, LLC. All rights reserved. Reproduction in any media or format, in whole or in part, of any report or map of Environmental Data Resources, LLC, or its affiliates, is prohibited without prior written permission.

EDR and its logos (including Sanborn and Sanborn Map) are trademarks of Environmental Data Resources, LLC or its affiliates. All other trademarks used herein are the property of their respective owners.

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal hazardous waste facilities

SHWS: Contains information on releases of oil and hazardous materials that have been reported to DEP.

A review of the SHWS list, as provided by EDR, and dated 02/13/2025 has revealed that there are 8 SHWS sites within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
ROUTE 24 N EXIT 15 Release Tracking Number: 4-0022295 Current Status: RAO	RTE 24 N	NNW 0 - 1/8 (0.038 mi.)	A1	8

State and tribal institutional control / engineering control registries

INST CONTROL: Activity and Use Limitations establish limits and conditions on the future use of contaminated property, and therefore allow cleanups to be tailored to these uses.

A review of the INST CONTROL list, as provided by EDR, and dated 02/13/2025 has revealed that there is 1 INST CONTROL site within approximately 0.5 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
Not reported	150 NORLEN PARK	SSW 1/4 - 1/2 (0.333 mi.)	4	12

Release Tracking Number: 4-0015351

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

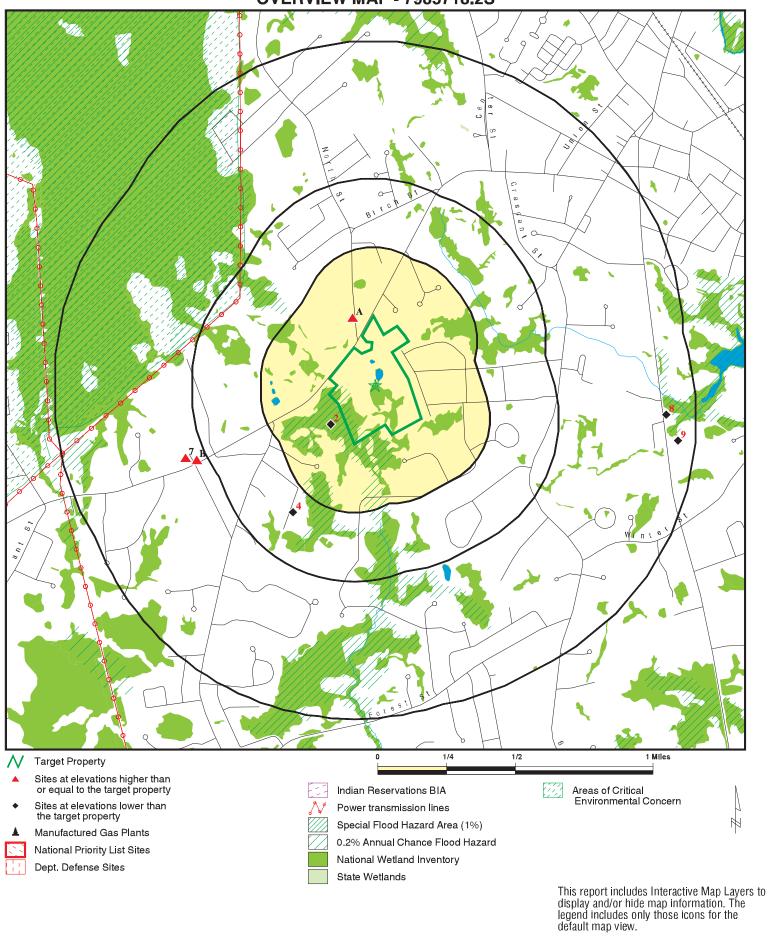

A review of the E MANIFEST list, as provided by EDR, and dated 02/17/2025 has revealed that there is 1 E MANIFEST site within approximately 0.25 miles of the target property.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

BROWNFIELDS: Completed Brownfields Covenants Listing

Under Massachusetts law, M.G.L. c. 21E is the statute that governs the cleanup of releases of oil and/or hazardous material to the environment. The Brownfields Act of 1998 amended M.G.L. c. 21E by establishing significant liability relief and financial incentives to spur the redevelopment of brownfields, while ensuring that the Commonwealth's environmental standards are met. Most brownfields are redeveloped with the benefit of liability protections that operate automatically under M.G.L. c. 21E.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

UST FINDER RELEASE: UST Finder Releases Database

US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Southwest Map: 19020071 TAUNTON, MA

Version Date: 2021

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

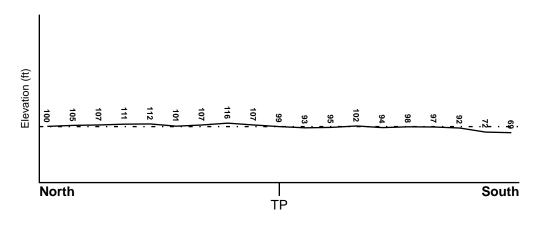

TOPOGRAPHIC INFORMATION

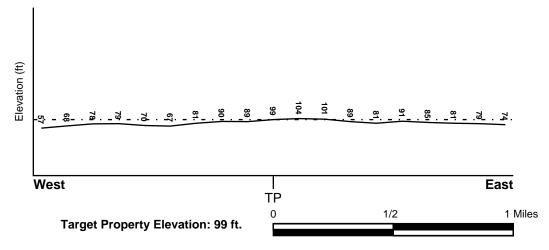

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

BRIDGEWATER YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

GEOLOGIC AGE IDENTIFICATION

Era: Paleozoic Category: Stratifed Sequence

System: Pennsylvanian Series: Pennsylvanian

Code: PP (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: MONTAUK

Soil Surface Texture: extremely stony - sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward

movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to

water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: LOW

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	2 inches	extremely stony - sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 0.60	Max: 6.00 Min: 3.60
2	2 inches	27 inches	fine sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 6.00 Min: 0.60	Max: 6.00 Min: 3.60
3	27 inches	72 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 0.60 Min: 0.06	Max: 6.00 Min: 3.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: extremely stony - fine sandy loam

muck

unweathered bedrock very stony - fine sandy loam

sandy loam

Surficial Soil Types: extremely stony - fine sandy loam

muck

unweathered bedrock very stony - fine sandy loam

sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: gravelly - loamy sand

loamy sand sand

unweathered bedrock sapric material

very gravelly - loamy coarse sand

fine sandy loam

stratified

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers

Source: Executive Office of Environmental Affairs

Telephone:

Public Water Supply Database

Telephone:

The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

Areas of Critical Environmental Concern

Telephone:

The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers

Telephone:

The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by an EPA hydrogeologist.

Aquifers

Telephone:

MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas

Telephone:

Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

DEP Approved Zone IIs

Telephone:

The Department of Environmental Protection (DEP) approved Zone IIs datalayer was compiled by the DEP Division of Water Supply (DWS). The database contains 281 approved Zone IIs statewide. As stated in 310 CMR 22.02, a Zone II is 'that area of an aquifer which contributes water to a well under the most severe pumping and recharge conditions that can be realistically anticipated (180 days of pumping at safe yield, with no recharge from precipitation.) It is bounded by the groundwater divides which result from pumping the well and by the contact of the aquifer with less permeable materials such as till or bedrock. In some cases, streams or lakes may act as recharge boundaries. In all cases, Zone IIs shall extend up gradient to its point of intersection with prevailing hydrogeologic boundaries (a groundwater flow divide, a contact with till or bedrock, or a recharge boundary).' These data are used in association with the Public Water Supplies datalayer. The following describes certain unique features of this association.\n - Any proposed new well which will pump at least 100,000 gallons per day must have a Zone II delineation completed and approved by DEP prior to the well coming on line. \n - Additionally, a new source may not be on-line yet, but other, older wells may fall within its Zone II boundary.\n - Further, existing wells must have a Zone II delineated as a condition of receiving a water withdrawal permit under the Water Management Act.

OTHER STATE DATABASE INFORMATION

RADON

State Database: MA Radon Source: Department of Health Telephone: 413-586-7525 Radon Test Results

Area Radon Information Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.
