

# Residential Electrical Permit Fees

## Notes

The Electrical Inspector reserves the right to establish fair market value of work in order to calculate permit fee. Calculation results in a fraction of a dollar; fee is rounded up to the next dollar. Paper applications are accepted; however, an additional \$50.00 administrative fee will be applied. All work shall be done in accordance with the requirements of the Massachusetts Electrical Code and regulations of National Grid. Service entrance locations must be obtained from National Grid. Permit number must accompany all inspection requests. Permits are valid for one year from the date of issue. Permit applicants are required to arrange for inspections upon completion of work. MGL 143 3L.
