

**Filter Bags that will be placed on  
PFAS Pad**

A wide-angle photograph of a construction site. In the foreground, a large, rectangular concrete pad is being prepared. The pad is divided into sections by expansion joints. To the right of the pad, a large, cylindrical metal filter unit is mounted on a concrete base. The filter unit has a red valve and a yellow strap. In the foreground, a coiled blue hose lies on the ground. The background shows a dense line of green trees under a bright blue sky with scattered white clouds. A person is visible in the distance, standing near the edge of the concrete pad.
